

Residential Awning Window

Description

The Armani Residential Awning Window has been designed to compliment and add style to any home with the safety and security you would expect from Armani Aluminium Windows. The Awning Window can be glazed with a minimum 5mm to a maximum 6.52mm glass (cyclonic glazing). The awning window's cyclonic glazing has been produced and tested to withstand cyclonic ratings. The sash is top hung with a sleek colour matched key lock awning winder for an effortless opening. As an optional extra for added safety and security, the awning winder is available with a minimum 100mm opening restriction for pool areas or children's rooms and is collapsible to suit any window decor. The classic option for any home, the Residential Awning Window is available in a range of sizes, configurations, glass options and colours with a wide variety of optional extras. For more information, please contact the Armani Sales Team on 9248 1203.
